

# The Communication Solution for COVID-19

## 1 Residents staying in touch with family

Family Anxiety around the resident's condition and the resident feeling isolated during visitation restrictions are curbed. Mint Social is centred around the Resident. Families can easily send/receive text, images and video updates from their loved one or from a staff member on behalf of them during restricted visitation.

## 2 A single source of truth direct from leadership

Clear communication is key during this time for staff, residents and families. Executives in the organisation can communicate with our announcement feature or our sms broadcast for urgent updates that bring alignment to the whole organisation. No opinions or outside directives creating confusion.

**SMS Broadcast to all stakeholders** Bring Clarity and Direction quickly via SMS to every stakeholder

**Organisation-wide Announcements** Send video, photo or text announcements to every network in your organisation. Executives can easily convey tone and communicate clearly every crucial update to staff, residents and families at every location.

We can help you communicate. Contact us to see how we can help you today.
